PITCHED ROOF FLASHING WITH LEADAX®

With the introduction of the new FX Easy pitched roof flashing with Leadax®
Burgerhout takes a next step in installation convenience. Following the successful
launch of the EasySafe flue gas system the range has been extended with the
FX Easy pitched roof flashing; another labour saving product for the installer.
With this Burgerhout has a scoop: this pitched roof flashing is equipped with
Leadax®, the first lead substitute in the world having the same properties as
traditional lead.

Leadax®, the new lead

In developing the FX Easy pitched roof flashing Burgerhout started looking for ways to make
this product as sustainable as possible and recyclable. After reviewing all the options Leadax®
was chosen.

Leadax® has no harmful effects on health and the environment. Leadax® has the same
unique features as traditional water-resistant materials such as lead and zinc, without
compromising quality or flexibility. Leadax® is a fully circular product, making it unique as a
lead replacement and contributes to the sustainability of the world.

Wide range of roof pitches from 15° to 60°

The FX Easy pitched roof flashing is suitable for roof pitches from 15° up to 60°.
Offering the best range of any single product. This is made possible by the reversible
hinged collar ranging 15° - 37.5° on one side or 37.5° - 60° on the other.

By securing the reversible hinged collar with a **"click"**, the installer is assured of
a good connection after the installation of the roof terminal.

**Increased angle
adjustment**

1 roof tile solution

No sag of roof flashing

All of the unique features in a row

- A universal tile solution for quick installation over the entire range
- Suitable for pitched tiled roofs with an angle of inclination from 15° to 60°
- Reversible hinged collar with one-click attachment
- Leadax®: High-quality material with the same properties as lead
- Easy to apply using traditional skills to dress the Leadax®
- Clear marking on the hinge cap for the correct angle settings
- Durable and circular
- Suitable for range from ø100 to ø170
- Also available as a combination package with Skyline roof terminal
- Available in the colours black and terracotta
